SUMMARY

Third-year **Computer Science** engineer (**2027 batch**, CGPA **9.5**) with hands-on experience building and deploying **production-grade SaaS platforms, REST APIs, and AI-powered applications** across **3 startup internships**. Proficient in **Java, Python, React, FastAPI, PostgreSQL, Docker, and AWS**. **ACM India Summer School 2026** selectee; **200+ LeetCode** problems solved (Medium/Hard focus).

EXPERIENCE

- **Full Stack Developer Intern** *MyDukan - Nov 2025 – Mar 2026*
 - Shipped **multi-tenant SaaS ERP** features; architected **Redux + RTK Query** state across product, inventory, and billing modules, cutting redundant API calls and improving frontend performance by **30%**.
 - Redesigned product and stock workflows handling **10K+ SKUs per tenant**, improving data consistency and UI quality.
- **Full Stack Developer Intern** *Vrittify AI - Oct 2025 – Jan 2026 (part-time)*
 - Developed scalable modules using **React.js, Express, and MongoDB** in a team of 5+, contributing to a **30% improvement in feature delivery speed**.
 - Designed and deployed **RESTful APIs** for production use, ensuring reliability and maintainability across distributed services.
- **Backend Intern** *Dealora - Nov 2025 – Jan 2026 (part-time)*
 - Built and optimized **RESTful APIs**, database schemas, and **automated background jobs** for a coupon-based mobile app, handling real-time data sync and improving system reliability.

PROJECTS

- **Transformer-based Web Application Firewall (WAF)** (*Python, FastAPI, PyTorch, SQLite, Docker*) [GitHub](#)
 - Built an **AI-driven WAF** using **Transformer models**, performing real-time **HTTP anomaly and threat detection** with **95% accuracy**.
 - Integrated with **Nginx/Apache**; built **REST APIs**, a web UI, and an automated retraining pipeline for live detection at scale.
- **Net Zero Campus** (*React.js, Node.js, MongoDB, Firebase, OpenAI API*) [GitHub](#)
 - Built a full-stack **SaaS dashboard** with **real-time analytics**, AI-driven insights, and gamified resource tracking, engaging **300+ users**.
 - Designed **multi-tenant role-based authentication** and consumption analytics, surfacing optimization opportunities and improving goal tracking by **40%**.
- **Nabha Telemedicine Platform** (*React Native, Node.js, Express, MongoDB*) [GitHub](#)
 - Built an **AI-powered telemedicine platform** connecting **500+ rural patients** and doctors, improving communication efficiency by **40%**.
 - Added **emergency response, multilingual, and offline-first** features, boosting accessibility by **35%**.

EDUCATION

- 2023 – 2027 **Bachelor of Engineering (Computer Science)** – Dayananda Sagar College of Engineering, Bengaluru (**9.5 CGPA**)
- 2022 **Class 12** – Govt. Inter College (**92.2%, State Rank 12 – Bihar Board**)
- 2020 **Class 10** – Shri Shankar High School (**88.8%**)

TECHNICAL SKILLS

Languages:	Java, Python, C++, JavaScript, TypeScript, SQL
Backend & Databases:	Node.js, Express.js, FastAPI, REST APIs, Microservices, PostgreSQL, MongoDB, SQLite, Schema Design
Frontend:	React.js, React Native, Redux, RTK Query, HTML/CSS, Tailwind
Cloud & DevOps:	AWS (EC2, S3), Docker, Firebase, Linux, Git, GitHub, CI/CD
CS Fundamentals:	DSA, OOP, DBMS, System Design, Distributed Systems

AWARDS AND CERTIFICATIONS

- **ACM India Summer School 2026 Selectee** – Competitive Programming track, hosted at Dhirubhai Ambani University, Gandhinagar.
- **Smart India Hackathon 2025 Internal Winner** – Transformer-based WAF selected among top national-level entries.
- **Runner-up, Udaya 1.0 Hackathon 2025** – Secured 2nd place among 50+ teams for a full-stack sustainability SaaS platform.
- **State Rank 12, Bihar Board** – Class XII State Topper across Bihar.
- **OCI 2025 Certified** – Oracle Generative AI & Data Science Professional credential.
- **Google Cloud Career Launchpad** – Completed Computing Foundations Track.
- **NPTEL Certified** – Data Structures & Algorithms (Java), problem-solving fundamentals.
